Data Visualization, Process Analysis and Modeling

Soft Skills: Strong communication and interpersonal skills, Effective time management and timely delivery, MS PowerPoint

Professional Experience:

Unicomer Jamaica Ltd.

October 2021 – November 2024

Regional Business Intelligence Analyst (Operations Dept.)

A business intelligence role in a retail-operations space requires timely dissemination of insights and analyses in a thorough and accurate manner. Data in a retail environment is rich and likely to have information which, once exposed and explored by a creative mind may develop to the proven systems and models for revenue growth.

- ❖ Extraction, transformation and loading (ETL) operations to report on performance for in-store and on ecommerce platforms from database.
- ❖ Implementation of data-centric analyses to monitor changing customer trends and sentiment by reformatting model relevance tested by statistical insights to improve sales performance and revenues using Python and statistical analyses.

- ❖ Created and tracked CAPEX project management framework using MSEXcel, through task reconciliation for construction projects for Courts Drax Hall and Washington Blvd branch to maintain budget and track performance.
- ❖ Improved and automated standards for sustainability reports across the region to monitor ROI, solar wattage produced, carbon credits due and solar panel maintenance for annual review and discussions using machine learning for fields expected vs actual wattage output.
- ❖ Improved reporting standards for operational reports (including eCommerce, campaign analysis and customer retail repairs) using PowerBI by creating and maintaining interactive dashboards using PowerQuery/PowerBI. To track KPIs on a monthly, quarterly and annual cadence.
- ❖ Developed machine learning (ML) algorithms that would predict sales used for lead generation through predictive analytics.
- ❖ Deployed a workforce management (WFM) scheduling extension designed to forecast on a 30-minute basis inflows of inbound calls to the contact center based on historical call volumes using forecasting and predictive analytics.

GraceKennedy Ltd.

May 2016 – February 2021

Supply Support Officer

The experience provided insights on the impact of an effective global supply chain on ensuring economic stability, the role created the opportunity to:

- ❖ Practice scheduling, stock and order management, cost reconciliations for accounting charges.
- ❖ Conducted linear programming, time series modeling and simulation/scenario planning for stock requirements and general inventory flows to navigate the demand and supply shocks in MS Excel.
- ❖ Managed portfolios for brands for best raw material price negotiations.
